1. Executive Summary

Started last semester, the project's local team staffing process was completed and the successful candidate for the coordination joined the project team in mid-January 2008 and then took his position in the field in early March. The first phase of equipment purchasing also was completed with the procurement of one generator and the second-hand vehicle.

Two initial workshops were held in both countries, in order to share information about the project with the main local stakeholders and beneficiaries and foster their real involvement and active contribution in project implementation. Besides bringing stakeholders together on a common project task, these workshops were good occasions for local government authorities and local communities' leaders to show their full acceptance and their support for project implementation. A significant awareness and outreach effort was performed through wide media coverage on the initiatives.

Follow up actions finally resulted in feedback from Ramsar office about the Niimi designation process progress as well as on the technical conditions for a transboundary site designation. Another partnership with GIRMaC project was initiated for joint efforts in the transboundary management plan elaboration. In the public awareness sector, activities included the establishment of contacts with target groups' leaders (school managers, local communities' leaders, etc.) and a weekly program under development with a local Radio channel. The improvement of Niimi Park's headquarters has started; good ground works were conducted by a group of volunteers (from the local populations) to clear surrounding areas. The production and installation of park signboards has started.

At the international level, the participation in the global WOW team meeting held in The Netherlands in January 2008 was successful and provided an opportunity for gaining a better understanding of the overall project and establish contacts with other demonstration projects teams representing six staff members from West Africa and around 24 other from the other centers.

The project steering committee members were identified, and the first meeting is planned for June 2008. The reporting period also was marked, as for the other demonstration projects, by GEF budget and payment schedule revisions.

1.1 Key project achievements during the reporting period

This section highlights important project achievements in the reporting period.

#	Key Project Achievements
1	Completion of the recruitment of the project coordinator and installation of the field team. This occasion was used to formally present the project team to the Gambian Minister of the Environment and Rural Community leaders.
2	Finalization and signature of the tripartite agreement between Wetlands International, the Department of Parks and Wildlife Management of The Gambia and the Direction des Parcs Nationaux of Senegal for the project's implementation
3	Completion of the first phase of the project materials procurement
4	Holding of two project initial workshops, one in each country, and sharing project information with the main local communities and governmental authorities.
5	Contacts with International Organizations Partners and other resource persons leading to the establishment of the project Steering Committee. The first meeting of this committee planned for June 2008.
6	Improvement of Niimi Park headquarters – with strong participation of local populations and small public awareness meetings with village communities.

1.2 Key issues & proposed solutions

Issues those require the focused attention of the WOW Project Coordination Unit and/or UNOPS.

#	Issue	Proposed Solution	Deadline	Party Responsible
1	Exchange rate between the CFA, American dollar, and the Gambian Dalasi.	Awareness of problem during course of project.	Ongoing	All relevant actors
2	Lack of internet connection at the site level	Use of local cybercafés for internet.	As much as possible	WI, Project Manager
3	International phone connection, difficult in the Transboundary communication	Purchase of more phone credit.	Ongoing	WI, Project Manager
4	Less park staff at both sites	Efforts to develop synergy for a stronger involvement of local populations	Ongoing	DPWM, DPN, WOW Project
5	Lack of communities availability in the project due to family obligations	A better communication between project and relevant actors.	Ongoing	All relevant actors

2. Project Management

The following table highlights issues that affect project performance and achievement of expected outcomes, and describe proposed next steps.

CATEGORY	ISSUES Description of issues affecting project performance during the reporting period	PROPOSED SOLUTIONS Description of decisions / actions to be taken	DEADLINE	PARTY RESPONSIBLE
Recruitment & management of staff and consultants	An intern is available to support the project team in the field. He not yet start due to some personal problems he has to resolve till August 2008	Keep contact with him		
Finance & administration	Variation of American dollar value	Awareness of problem's effect on the project's financial resources	Till end of the project	WI, Project coordinator
Logistics & operations	Operational and use conditions for the vehicle purchased	Develop a clear use conditions manual for the vehicle.	July 2008	WI
Reporting & communication	Lack of internet, lack of cybercafés in close proximity, and insufficiency of phone credit for international calls	Use of available cybercafés when possible and especially the purchase of additional international phone credit	Ongoing	WI, Project Coordinator
Coordination with project partners	Occasional lack of availability of partners due to professional obligations Delay in reaction from partner in some joint activities	Continue to communicate clearly with project partners	Ongoing	All actors and organizations
External issues (e.g. difficult access to the project site for political/social/environmental reasons, etc.)				
Other	No problems encountered at this time.			

2.2 Project Steering Committee (SC)

Date of last SC Meeting	
Proposed Date for next SC Meeting	24 th June 2008 in Toubacouta, Senegal
QUESTION	ANSWER
This report was reviewed and approved by the Project SC?	NO. SC meeting planned for end june2008
The workplan & budget for next six months was reviewed & approved by the Project SC?	Yes
The SC is meeting periodically and providing effective direction/inputs?	The Steering Committee will meet twice a year and does not do so in an extraordinary manner. It defines and orients the project's strategic actions, conforming to the adopted workplan.

The persons below were contacted and gave their approval to be member of the committee. The chairperson will formally be appointed during the first meeting planned for end of June 2008.

5. Performance Evaluation

5.1 Logical framework

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of May 2008	Risks and assumptions
Development Objective					
Conservation and sustainable use of the Saloum-Niumi complex critical site for migratory waterbirds	Results of pending survey of nesting birds and reproduction sites. Strong implication of local populations in survey.	Availability of baseline given of bird populations and strong presence of community (eco-guards) in survey.			.
Immediate Objective					
Effective trans-boundary cooperation on key management issues, including increased community participation.	Saloum-Niumi Complex legally established as a trans-boundary reserve & Ramsar / AEWA site. A 10% increase of PAMETT scores by the end of the demonstration project.	Trans-boundary agreement, National legislation & international (Ramsar) convention ledgers PAMETT prepared by park staff.	Agreement signed in June 2001 between the two countries for a trans-boundary management of protected areas. Saloum park already designated as Ramsar site	Feedback from Ramsar office on the process of Niumi park designation as Ramsar site; Additional required information under collection to continue the process	Current transboundary cooperation not especially motivated.

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of May 2008	Risks and assumptions
Outcomes					
Outcome 1. Park staff cooperating on management and monitoring in the Saloum-Niumi Complex.	<p>Joint trans-boundary management plan endorsed and being implemented.</p> <p>Program of joint surveillance and bird monitoring work ongoing.</p>	<p>Annual protected area progress reports</p> <p>Surveillance reports & bird breeding records.</p>	<p>Existing separate plans for each of two sites; both under revision</p> <p>- Bird survey is not carried out regularly each year. Eco-guards currently inactive in the parks.</p> <p>- No joint control and no existence of joint management between parks despite the shared natural resources.</p>	<p>The two managements plan digitalised and under revision; Increase understanding of each sites management strategies; Consultants' ToRs under elaboration for the management plan elaboration work</p> <p>Preparation for joint surveillance and counting of birds</p>	<p>Political stability & bilateral goodwill. The Gambia government agrees to Ramsar ratification.</p> <p>Long-term commitment of volunteer, unpaid eco-guards</p>
Outcome 2. Improved participatory approach to conservation and sustainable use.	<p>Relevant section of PAMETT increases by 5%</p> <p>Trained staffs remain at the site.</p> <p>Community <i>ecogardes</i> remain available & willing to participate in joint trans-boundary activities.</p>	<p>Course & post-training evaluations and tests.</p> <p>Judgement of on-site situation through monitoring missions.</p> <p>Annual protected area reports</p>	<p>--</p> <p>Low participation in conservation Eco-rangers in Niumi not trained</p> <p>Some local Eco-rangers & ecotourism guides trained in the past but not recognised by government structures</p>	<p>Increase participation of local communities Implication and participation of local authorities</p> <p>Setting up and Improved knowledge of a group of 25 Eco-rangers including 7 girls in Niumi park. This group of volunteers was provided with notions and techniques on sites surveillance and in ecotourism.</p>	<p>Availability of volunteers</p>

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of May 2008	Risks and assumptions
Outcome 3. Awareness among key groups raised on the importance of trans-boundary cooperation for improved wetland management	TV and radios programmes, number of articles in newspapers, mention of site among high level officials	Cassettes, news papers articles and TV Programs	No information about the transboundary issues Any specific TV program or articles	The subject is viewed and aired at Gambia's Radio and Television Service three times and through five private radios channels in Senegal	Policy-makers remain in power / delegate work.

5.2 Protected Areas Management Effectiveness Tracking Tool

QUESTION	ANSWER
Was the PAMETT performed for the protected area?	YES
Date of first PAMETT:	October 2007
PAMETT performed by:	Moustapha Mbaye (Saloum) / Alagie Manjang and Lamine Drammeh (Niumi)

5.3 Project Impact

QUESTION	ANSWER
STAKEHOLDERS	
# of NGO staff involved in this project	05
# of Government Staff involved in this project	06
# of Volunteers involved in this project	40
# of Government staff involved in Flyways issues (AEWA in particular)	2
TARGET BENEFICIARIES	
# of beneficiaries involved in this project	100 000
# of people involved in project workshops	200
# of people trained under this project	40
COMMUNICATION ISSUES	
# of press articles featuring the project and/or related issues	-
# of TV/radio programs featuring the project and/or related issues	06
# of publications produced under this project	-
Estimated # of people reached by project communication efforts	300 000

6. Key Lessons Learned

- Although they are full members of the local coordination team, the management of activities with focal points on the site requires more tact in order to get from them the spirit of support and continuity with the existing activities as well as for the enhancement of in-kind contributions which prevail in the strategy for the project implementation.
- Real positive enthusiasm from local communities (especially in Niumi) who are just need external support to participate in carrying out of activities.

7. Workplan for the Next Semi-annual Period

7.1 Updated overall project workplan

This project updated workplan below take into account the activities revision made during the period for the coming semesters. The most activities are forwarded as much as possible to complete the most important activities at end of 2009.

ACTIVITY	YEAR 2008		YEAR 2009
