

WOW
WINGS OVER WETLANDS
The UNEP-GEF African-Eurasian Flyways Project

WOW - DEMONSTRATION PROJECT
SEMI-ANNUAL REPORT

REPORT #: 05
REPORTING PERIOD: December 09– March 2010
REPORT PREPARED BY: Bounama Dieye, Lamine Kane, Lamin Drammeh, Gabin Agblonon

Country	Senegal and The Gambia
Project Title	Trans-boundary cooperation and community participation in the Saloum-Niumi Complex, Senegal / The Gambia
Project ref. number	G 8
Name of Local Implementing Agency/NGO	Wetlands International, Africa Office
Total amount of funds under this agreement	USD 400,000
Expected project duration	1 st May 2007 – 31 st December 2009
Date of signature of the agreement	27 th March 2007
Contact in Local Implementing Agency/NGO	Name: Abdoulaye Ndiaye Title: Capacity Development Manager e-mail: ablaywet@orange.sn / site web: www.wetlands.org Tel: +221 33 869 16 81 Fax: +221 33 825 12 92

1. Executive Summary

During this last period of the project activities, main focus was made on the process to complete the review of the Transboundary Management Plan document developed with support from the hired consultants and then make it officially recognized by parties and other relevant stakeholders involved. This process, in spite of the lot of energy expended by the project team both at regional and field coordination level, was not completely completed as planned at beginning of the reporting period. However, the main steps towards to the final validation workshop have been taken and this last and important meeting within the process will take place in Saloum, but bit later after the cut-off date of the activities.

Some regular activities like the monthly joint monitoring of birds within the Complex and population awareness activities continue over the first three months in 2010. This period gave the opportunity to proceed to the second international birds counts in the complex and then to the capitalization of the data collected since the beginning of this activity under WOW.

1.1 Key project achievements during the reporting period

This section highlights most important project achievements in the reporting period.

#	Key Project Achievements
1	Review of the Management Plan document by the Park department at the level of both countries
2	Second annual and coordinated birds counts within the complex. Then compilation and harmonization of data collected since the beginning of this activity under WOW.
3	Sensitization of populations about the project activities closing in order to keep them informed about the follow-up of results achieved and the possibilities for the implementation of the Plan

A. Summary

From the beginning to the end of the first semester, the project activities was dedicated to the staffing and the establishment of the team in the sites for the regular field operations which have involved parks staff, local communities members and local authorities during the whole project implementation.

Till to March 2010, the activities undertaken under the project covered various areas following the three mains outcomes established for the project. These activities have included:

1- for the cooperation in the management and monitoring in the Saloum-Niumi complex, the process led together by both countries (Senegal & The Gambia) park's authorities for the complex official designation as transboundary Ramsar site and the development of an integrated Transboundary Management Plan for the Complex. Setting up of mixed teams from the parks' staff and joint water bird count and monitoring activities in the complex and the procurement of some field equipment to support the parks' infrastructure.

2-for the improving of the participatory approach to conservation and sustainable resources use in the complex, many capacity building activities were conducted as training sessions at site level addressing the parks' staff and communities' members including the government and other local politic authorities which are the real decision makers at site level. These sessions were supported by exchange visits conducted at both national and regional level with other sites and parks managers.

3-for the awareness of the key groups on the importance of the transboundary cooperation for improved wetland management, the project team defined and implemented a public awareness and

sensitization actions addressing various categories of communities' members in and around the complex areas. The policy-makers at national level were also targeted through, e.g. some meetings in The Gambia with the Minister in charge of environment issues.

The implementation of all these activities initiated by the project team and undertaken with a real support and a real adhesion from the populations and local authorities allowed achieving the realizations listed below.

B Key project achievements

This section highlights important project achievements.

#	Key Project Achievements	Dates
1	Designation of Niimi National Park as Ramsar site and then the Saloum-Niimi Complex as 1 st Transboundary Ramsar site in Africa.	Nov. 08
2	A transboundary Management Plan for the complex under final review and adoption process.	March 10
3	Restoration and installation of some facilities in the Niimi National Park to encourage tourism	During project
4	Improvement of parks' headquarters capacity and infrastructures through procurement of some field materials and equipments.	During project
5	Production and installation of parks' signboards within the complex.	Dec. 08
6	Setting up of local ecoguards group (volunteers from local communities' members) at the Niimi National Park side within the complex.	During project
7	Capacity building of the parks' staff and volunteers (about total of 30 persons) in various technical thematic (GPS using, birds monitoring, tourists guiding, etc) and joint birds counts and birds monitoring activities within the complex including two international birds counts by the complex staff..	During project
8	Capacity building of communities' members (specially women groups) up to +/- 60 persons for a sustainable use of natural resources in the complex through training sessions on topics like nature friendly collection of oysters, sustainable use of fisheries, vegetable farming, management of small income generating activities, etc.	During project
9	Exchange visits at site and national level to support the capacity building of the complex park's staff and volunteers as well as of the trained communities' members.	March 09
10	International exchange visit with WOW Demo project team from Estonia	Jan 09
11	Regional (West Africa sites managers) exchange visit in collaboration with Eurosite with exploration and discussion on the possibilities to establish an African sites' managers' network.	Feb 09
12	Series of awareness and sensitization communication addressing local communities' leaders and other members through programs on local radio channel (Saloum) and folkloric public animations with local drama group (Niimi).	During project
13	Awareness and sensitization within countries authorities at national level through parks department and some special meetings with these authorities like the Gambian Environment Minister.	During project
14	Awareness and sensitization discussion sessions for children within schools in and around the complex.	June to Dec 09

1.2 Key issues & proposed solutions

Issues that require the focused attention of the WOW Project Coordination Unit and/or UNOPS.

#	Issue	Proposed Solution	Deadline	Party Responsible
1				
2				

2. Project Management

The following table highlights issues that affect project performance and achievement of expected outcomes, and describe proposed next steps.

CATEGORY	ISSUES Description of issues affecting project performance during the reporting period	PROPOSED SOLUTIONS Description of decisions / actions to be taken	DEADLINE	PARTY RESPONSIBLE
Recruitment & management of staff and consultants				
Finance & administration				
Logistics & operations				
Reporting & communication				
Coordination with project partners				
External issues (e.g. difficult access to the project site for political/social/environmental reasons, etc.)				
Other				

2.2 Project Steering Committee (SC)

Date of last SC Meeting	20 th & 21 st August 2009
Proposed Date for next SC Meeting	

QUESTION	ANSWER
This report was reviewed and approved by the Project SC?	No
The workplan & budget for next six months was reviewed & approved by the Project SC?	No, but review done within the team
The SC is meeting periodically and providing effective direction/inputs?	Yes, every semester. However daily consultation of the Committee members on specific cases.

During the last Steering Committee meeting, Ndey Sireng Bakurin was unanimously designated by other members as new chairman.

3. Progress / Issues / Proposed Solutions

ACTIVITIES (as listed in the approved project document)	EXPECTED COMPLETION DATE	STATUS	PROGRESS Description of work undertaken during the reporting period	ISSUES & PROPOSED SOLUTIONS Description of problems encountered; Issues that need to be addressed; Decisions / Actions to be taken	PARTY RESPONSIBLE
Legend: (IP) In progress; (C) Completed; ↑ increased with respect to prior report; (–) unchanged; ↓ revised downwards; (NA) Not scheduled for current reporting period.					
Outcome 1					
Park staff cooperating on management and monitoring in the Saloum-Niumi Complex.					
Activity 1.1 <i>Designate transboundary Ramsar Site</i>	June 2009	(C)	Transboundary site has officially been designated since November 2008.		
Activity 1.2 <i>Develop an integrated transboundary management plan</i>	February 2010	IP 85% (70%) ↑	Review and amendment of the draft document produced by consultants were done at park departments' level in both countries. The comments and observation from these preliminary meetings were taken into account and a new work document was produced for final validation together with the parties present in and around the complex.	The only one and big thing to do for the completion of this activity is the final validation meeting including all main parties and the other ones (project, organizations, government technical services). This was delayed because of planning conflicts. It should be held in April following the new plan agreed with partners	
Activity 1.3 <i>Strengthen surveillance of waterbird breeding colonies</i>	Over all project duration (In breeding seasons)	IP 100% (90%) (C)	A second international annual and coordinated waterbirds counts were conducted in the complex by local staff and volunteers. Then regular monthly activities then continued till March 10	Though the joint exercise well started and worked till, the system remains fragile and need to be consolidated particularly in Niumi side.	
Activity 1.4 <i>Support Parks' Infrastructure</i>	December 2009	100% (97,5%) (C)	Purchase of remain field equipment listed by parties.		

ACTIVITIES (as listed in the approved project document)	EXPECTED COMPLETION DATE	STATUS	PROGRESS Description of work undertaken during the reporting period	ISSUES & PROPOSED SOLUTIONS Description of problems encountered; Issues that need to be addressed; Decisions / Actions to be taken	PARTY RESPONSIBLE
Legend: (IP) In progress; (C) Completed; ⬆ increased with respect to prior report; (–) unchanged; ⬇ revised downwards; (NA) Not scheduled for current reporting period.					
Outcome 2 Improved participatory approach to conservation and sustainable use.					
Activity 2.1 <i>Assess training needs and set-up training program</i>	Mars 2010	IP 95% (70%) ⬆	A long term training programme was explored and taken into account in the available version of the transboundary Management plan document.	The last thing we're looking for now is the formal validation of the whole document to end the process underway.	
Activity 2.2 <i>Staff Capacity-building</i>	Over all project duration	IP 100% (60%) ⬆	No more staff capacity building activities during the period		
Activity 2.3 <i>Community Capacity-building</i>	Over all project duration	100%	Additional sensitization at population level		
Outcome 3 Awareness among key groups raised on the importance of transboundary cooperation for improved wetland management					
Activity 3.1 <i>Awareness campaign (policy-makers)</i>	Ongoing throughout project's implementation	100% (75 %) (C)	Due to the situation in Niimi Park, <i>some</i> , strategic meetings with the officials in the Gambia to discuss about the site.		
Activity 3.2 <i>Promote sustainable use of natural resources</i>	Over all project duration	100% (70%) (C)	Checking against the and more meeting to take clear and carefully		

WOW – Wings Over Wetlands – Demonstration Project – Semi-Annual Report

ACTIVITIES (as listed in the approved project document)	EXPECTED COMPLETION DATE	STATUS	PROGRESS Description of work undertaken during the reporting period	ISSUES & PROPOSED SOLUTIONS Description of problems encountered; Issues that need to be addressed; Decisions / Actions to be taken	PARTY RESPONSIBLE
Legend: (IP) In progress; (C) Completed; ↑ increased with respect to prior report; (–) unchanged; ↓ revised downwards; (NA) Not scheduled for current reporting period.					
Activity 3.3 <i>Public awareness (of wetland values)</i>	Over all project duration	100% (80%) (C)	Some public additional sensitization specically at population level to sensitize and prepare them about the project closing and the necessity to keep track on the next steps of the plan validation		
Activity 3.4 <i>Sub-regional workshop & exchange program</i>	Over all project duration	(C) 0%			

4. Funds Disbursement

4.1 Disbursement of GEF Funds

Report on the status of GEF Funds managed under this Agreement with UNOPS.

Total Budget approved for the provision of technical services:	400 000 USD
Funds advanced by UNOPS to date:	378 000 USD
Opening balance this reporting period:	89 414 USD
Total expenditure this reporting period:	113 120 USD
Funds requested (as per disbursement schedule):	22 000 USD
Balance (if applicable):	- 23 706 USD

Certified by Projects Managers: In the field: Bounama Dieye; SRS office: Gabin Agblonon

General Category of Expenditure	Total budget (a)	Total expenditure to date (b)	Total budget balance (a-b)	Opening balance this period (c)	Last payment received	Expenditure in reporting period (d)	Balance at end of reporting period
Personnel	84 000	83 982	18	25 282	21 000	32 265	-6 983
Equipments	49 000	48 944	56	5 642	0	5 587	55
Subcontracts	24 000	15 629	8 371	13 719	0	7 108	6 611
Workshops and training	65 250	73 744	- 8 494	59	14 750	13 553	-13 494
<i>Steering Committee Meetings*</i>	18 750	13 628	5 122	5 122	6 250	0	5 122
Travel and operations	54 000	51 113	2 887	7 866	11 000	9 229	-1 363
Executing agency support overheads	32 000	33 334	- 1 334	7 502	5 000	10 836	-3 334
Monitoring, evaluation and auditing	13 000	13 821	- 821	13 000	5 000	13 634	-634
Field surveys, bird counting surveillance	48 000	49 670	- 1 670	7 378	8 000	13 748	-6 370
Miscellaneous and contingency	12 000	14 943	- 2 943	3 844	2 000	7 160	-3 316
Total	400 000	398 811	1 189	89 415	73 000	113 120	-23 706

NB: Please see detailed financial report in the excel sheet accompanying this technical report for more information

As proposed through the budget revision submitted with last semi-annual report, the remaining budget is used as follow:

- Personnel budget line serve to the field team salaries over the last quarter (\$7000), the financial incidental related to the termination of the contract with the project site coordinator (\$9100) and the last part (\$16165) to support part of WIA staff time over the period from May 2007 to March 2010.
- Equipment budget line serve for purchasing of additional field equipment and also for production of awareness materials (tee-shirts)
- Subcontract budget line covered the last payment for the consultant (\$5348) and the remaining after that is going to support the final validation meeting
- Workshops budget line is dedicated to the first revision meetings at department level and the final validation meeting of the Plan
- Monitoring and evaluation budget line covered, as agreed, costs related to the trip to South Africa and the a part of the WIA staff between May 2007 and March 2010
- The contingency budget line is going to covered costs related to the proof reading, translation and the printing of the final validated document of the Transboundary Management Plan.

4.2 Status of co-financing

Sources of co-financing	Total funds committed (cash)	Total in-kind contribution	Total co-financing (cash + in-kind)	Total received to date	Balance
WIA		\$ 108 500	\$ 108 500	\$ 69 027	\$ 39 473
WAAME		\$ 50 000	\$ 50 000		\$ 50 000
DPWM		\$ 201 500	\$ 201 500	\$ 130 675	\$ 70 825
DPN		\$ 40 000	\$ 40 000	\$ 25 400	\$ 14 600
Totals		\$ 400 000	\$ 400 000	\$ 225 102	\$ 174 898
List any additional sources of co-financing mobilized during project implementation					

5. Performance Evaluation

5.1 Logical framework

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of March 2010	Risks and assumptions
Development Objective					
Conservation and sustainable use of the Saloum-Niumi complex critical site for migratory waterbirds	Results of pending survey of nesting birds and reproduction sites. Strong implication of local populations in survey.	Availability of baseline given to bird populations and strong presence of guards and communities (eco-guards) in survey.	Birds survey and counting was only done in the Saloum	Regular (monthly) birds counting, monitoring and patrol in both sites of the complex. Community members (especially eco-guards and volunteers) are deeply involved in these works.	Stopping the survey programme in both the parks by eco-guards and guards
Immediate Objective					
Effective trans-boundary cooperation on key management issues, including increased community participation.	Saloum-Niumi Complex legally established as a trans-boundary reserve & Ramsar / AEWA site. A 10% increase of PAMETT scores by the end of the demonstration project.	Trans-boundary agreement, National legislation & international (Ramsar) convention ledgers PAMETT prepared by park staff.	Agreement (June 2001) between the countries for a trans-boundary management of the protected areas. Saloum park already designated as Ramsar site	Saloum-Niumi Complex formally designated as transboundary Ramsar site. A transboundary management plan elaborated for the whole complex and is going to be validated by parties involved	No available fund to support the first transboundary management plan in the complex Niumi - Saloum already elaborated

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of March 2010	Risks and assumptions
Outcomes					
Outcome 1. Park staff cooperating on management and monitoring in the Saloum-Niumi Complex.	<p>Joint trans-boundary management plan endorsed and being implemented.</p> <p>Program of joint surveillance and bird monitoring work ongoing.</p>	<p>Annual protected area progress reports</p> <p>Surveillance reports & bird breeding records.</p>	<p>Existing separate plans for each of two sites; both under revision</p> <p>- Bird survey is not carried out regularly each year. Eco-guards currently inactive in the parks.</p> <p>- No joint control and no existence of joint management between parks despite the shared natural resources.</p>	<p>Newly developed joint management plan endorsed by all relevant parties.</p> <p>Funds and strong partnerships will be necessary for its implementation. This could be linked and supported through to the process of establishment of the Saloum- Niumi Transboundary Biosphere Reserve which is leading by IUCN Senegal.</p> <p>Continuous monthly surveillance and more or less synchronized birds monitoring activities in the complex.</p> <p>Experimented staff from Saloum supporting the newly ones in Niumi through regular monitoring activities.</p>	<p>Lack of fund to support the implementation of the transboundary management plan in the complex Niumi - Saloum</p> <p>Lack of effective joint collaboration with organizations, partners acting in the site on the purpose of transboundary management plan.</p> <p>Political stability & bilateral goodwill.</p> <p>Long-term commitment of volunteers and unpaid eco-guards</p>
Outcome 2. Improved participatory approach to conservation and sustainable use.	<p>Relevant section of PAMETT increases by 5%</p> <p>Trained staffs remain at the site.</p>	<p>Course & post-training evaluations and tests. And the training reports</p> <p>Judgement of on-site situation through monitoring missions.</p>	<p>Low participation in conservation; Eco-rangers in Niumi not trained</p> <p>Some local Eco-rangers & ecoguides (Saloum) were trained in the past but not recognised by</p>	<p>Communities capacitated with some techniques of mangrove planting in order to enable them to lead themselves the rehabilitation of degraded ecosystem due to bad practices of oysters collection.</p>	<p>Unavailability of volunteers</p> <p>Lack of alternative livelihood for the community in the transboundary management plan</p>

Intervention Logic	Indicators of performance	Means of Verification	Baseline Situation	Status as of March 2010	Risks and assumptions
	Community <i>eco-guards</i> remain available & willing to participate in joint trans-boundary activities.	Annual protected area reports	government structures	Ecoguards and volunteers groups set-up in the Niomi park (under the project activities) are enthusiastic and willing to continue the activities but need support. More and other initiatives are needed to consolidate this group established in the Park	
Outcome 3. Awareness among key groups raised on the importance of trans-boundary cooperation for improved wetland management	TV and radios programmes, number of articles in newspapers, mention of site among high level officials.	Cassettes, news papers articles and TV Programs. Improving local communities living in the complex through the programmes implemented.	No information about the transboundary issues. Any specific TV program or articles.	Weekly information and sensitization programs implemented at local level through local community radio in the Saloum and public folkloric animations were held in Niomi till December 09.	Policy-makers remain in power / collective responsibility / delegate work.

5.2 Protected Areas Management Effectiveness Tracking Tool

QUESTION	ANSWER
Was the PAMETT performed for the protected area?	YES
Date of first PAMETT:	October 2007
PAMETT performed by:	Moustapha MBAYE (Saloum) / Alagie Manjang and Lamine Drammeh (Niumi)

5.3 Project Impact

QUESTION	ANSWER
STAKEHOLDERS	
# of NGO staff involved in this project	05
# of Government Staff involved in this project	06
# of Volunteers involved in this project	90
# of Government staff involved in Flyways issues (AEWA in particular)	3
TARGET BENEFICIARIES	
# of beneficiaries involved in this project	120 000
# of people involved in project workshops	500
# of people trained under this project	190
COMMUNICATION ISSUES	
# of press articles featuring the project and/or related issues	-
# of TV/radio programs featuring the project and/or related issues	08
# of publications produced under this project	-
Estimated # of people reached by project communication efforts	300 000

6. Key Lessons Learned

- Funds and partnerships have to be found and established for the implementation of the Transboundary Management Plan. Otherwise, we will come back to the previous situation in which each of the sites is considered as different in terms of management issues. Niumi has not enough financial support from the country government at this moment and the implementation of this shared management is very crucial for its development which is, somehow, started with the WOW activities. A real and big interest from populations is noticed about such implementation activities.
- Interventions of high level politics people remain frequent in the Park's management despite of the international rules regulating the functioning of the protected areas. Thus, some decisions affecting the integrity of Niumi Park are being taken this last months and means or appropriate ways should be found to address them properly.
- The establishment of the ecoguards group in Nimi Park was very useful and had an important role in the interest and the involvement of the communities members in the park's management issues

- Good collaboration effort was done between the ecoguards in the complex and is showed through the joint regular bird monitoring activities undertaken under the WOW activities. But this starting real cooperation should be consolidated with the support for the ecoguards and the park staff in the development and management of eco-development initiatives within the complex.
- Fragility of the administrative and political systems which are very changeable in the countries

ANNEXES

In each report, please include the following information in the annexes:

- ✓ List of workshops (title, date, location, # of participants) held in the period covered by this report
- ✓ List of technical reports produced in the period covered by this report
- ✓ List of media communication (TV/radio/press) released in the period covered by this report
- ✓ List of publications produced in the period covered by this report
- ✓ Updated inventory of equipment purchased with project funds (please use the table provided – double-click on the file icon below, insert items, and the “save” the file)

Please send by email to the PCU:

- ✓ 1 photograph of the project team as a group, and passport size photo of project manager (if not already submitted)
- ✓ Photographs representing main aspects of project work, and illustrating project impact (i.e. of workshops, field research, education and awareness, ecotourism, volunteer groups. Please take pictures illustrating the impact of the project, i.e. of the situation “before”, “during” and “after” the project)
- ✓ general photographs illustrating the environment of the site
- ✓ Soft copy of technical reports produced by project
- ✓ Soft copy of workshop reports

Please keep records of (for later review/consultation by the PCU)

- ✓ Financial records (invoices, receipts) of all expenditure incurred with project funds
- ✓ Hard copy of press articles and publications produced by the project
- ✓ Copy of TV/radio programs
